This course includes a reader compiled of classic stories written by Arabella Buckley and Julia McNair Wright in the late 1800s. It takes a charmingly narrative approach to the life of insects. And we have written a workbook to go along with it that takes your student through the identification of different kinds of insects, insect anatomy, and more! Add the *Peterson First Guide on Insects* published by Houghton Mifflin Harcourt in 1987, and this year-long course makes for a program your student will love!
