**Lung Tumors: Lung, Mediastinum, Pleura, and Chest Wall (Current treatment of cancer)** B. J. Addis  
This series on the treatment of cancer is sponsored by the UICe. The editors and authors feel strongly that more standardization in cancer therapy is needed on a worldwide basis. This, of course, is only possible if experts from all countries subscribe to a joint policy of making their treatment designs available to practising oncologists all over the world. Current Treatment of Cancer discusses all the equipment and methods now in use in cancer therapy. It covers all types of cancer, thus providing the reader with comprehensive information on cancer management. In recent decades there has been a tremendous improvement in the treatment of cancer, and there is hope for even further success in this fight. We are convinced that this series will help us to make a concerted response to the challenge of cancer. UICC Treatment and Rehabilitation Programme Ismail Elsebai Chairman Preface Part I Members of two institutions, the Brompton Hospital in London and the Finsen Institute in Copenhagen, were invited to write on lung cancer, and after reading the manuscripts it was decided that the contents of three pairs of chapters overlapped sufficiently for them to be combined.
