Image-Guided Spine Intervention, 1e Douglas S. Fenton, Leo F. Czervionke

This book provides all the information necessary to perform today's full range of image-guided interventional procedures for the alleviation of spine and back pain. Over 625 spectacular illustrations and images--combined with careful, step-by-step instructions show precisely how to perform each technique and avoid complications. Coverage includes important techniques such as facet joint and sacroiliac joint injections, vertebroplasty, discography, and intradiscal electrothermal therapy (IDET).

- Each chapter addresses a specific procedure, consistently covering pertinent anatomy · patient selection criteria · contraindications · equipment · medications · step-by-step procedural instructions · potential complications · post-procedure care · and follow-up guidelines
- All chapters conclude with informative case studies, relevant CPT® codes, references, and commentaries by an expert neurosurgeon.
- Hundreds of superb, full-color anatomical photographs-plus razor-sharp radiographs and MR and CT images-reproduce exactly what readers will see when performing each procedure.
- A full chapter examines the contrast agents, anesthetics, and steroids used during spinal procedures.
