Are you interested in pursuing a bachelor's, master's, or doctorate degree in Economics?

Why not consider Economics as your college major or career?

One of the most important decisions that you will make in college is to select a major. Such decision should not be taken lightly, as it has profound implications for your career and life after college. A wrong choice today will result in added semesters and tuition tomorrow.

- Do you feel you are underprepared when choosing a major?
- Are you choosing your major based on influence and assumptions?
- Are you looking to your adviser, parents, and peers rather than draw conclusions based on your own research, interests, abilities, and self-reflection?

If you answered “YES”, you are not alone.

Have YOU Declared your Major?

A recent research study shows that 80% of freshmen (first year college/university students) say they are undecided about their major. Most of them will change their minds multiple times even after they declare their major.

Even the “decided” students often do not base their decision of major on factual research and self-reflection. The biggest mistake both the undecided and decided students make is failing to research what’s required of the major, and the career.
