**Darwin in Galápagos: Footsteps to a New World** K. Thalia Grant, Gregory B. Estes

In 1835, during his voyage on *HMS Beagle*, Charles Darwin spent several weeks in Galápagos exploring the islands and making extensive notes on their natural history. *Darwin in Galápagos* is the first book to recreate Darwin's historic visit to the islands, following in his footsteps day by day and island by island as he records all that he observes around him.

Thalia Grant and Gregory Estes meticulously retrace Darwin's island expeditions, taking you on an unforgettable guided tour. Drawing from Darwin's original notebooks and logs from the *Beagle*, the latest findings by Darwin scholars and modern science, and their own intimate knowledge of the archipelago, Grant and Estes offer rare insights into Darwin's thinking about evolution in the context of the actual locales that inspired him. They introduce Darwin as a young naturalist in England and onboard the *Beagle* and then put you in his shoes as he explores remote places in the islands. They identify the unique animals and plants he observed and collected, and describe dramatic changes to the islands since Darwin's time. They also explore the importance of Darwin's observations and collections to the development of his thinking after the voyage.

Ideal for visitors to Galápagos and a delight for armchair travelers, *Darwin in Galápagos* is generously illustrated with color and black-and-white photographs and line drawings, as well as detailed maps of Darwin's island itinerary and informative box features on the archipelago's natural history.
