## **Electrical Stimulation of the Heart in the Study and Treatment of Tachycardias** Hein J.J. Wellens

The interplay between the careful analysis of clinical electrocardiograms and results from animal experiments have in the past 60 years resulted in provocative and brilliant concepts on the mechanisms of cardiac arrhythmias in man. Many of the animal experiments however were done on open-chested dogs with cut cardiac nerves and under the influence of pharmacological agents. It is doubtful, therefore, whether these results can be transferred without reservation to the human situation. The introduction of electrical stimulation of the heart in clinical cardiology has opened new ways to study some aspects of cardiac arrhythmias directly in the unanesthetized patient. This study reports observations on patients who were admitted to the University Department of Cardiology, Wilhelmina Gasthuis, Amsterdam, for the evaluation and treatment of tachycardias. Electrically induced premature beats were used in an effort to elucidate the origin and mechanism of these tachycardias. The first chapter is on classification and diagnosis of tachycardias with special emphasis on our current knowledge of the differential diagnosis between supraventricular tachycardias with aberrant conduction and ventricular tachycardias. This is followed by theoretical considerations on tachycardias especially in relation to the methods used in this study. After an outline of these methods the results of our studies in patients with atrial flutter, A-V junctional tachycardias and tachycardias related to the pre-excitation syndrome are reported. A discussion on the value of electrical stimulation for the treatment of tachycardias is followed by a summary of our results.

### **From reader reviews:**

#### **Pearlie Henry:**

Have you spare time for a day? What do you do when you have a lot more or little spare time? That's why, you can choose the suitable activity to get spend your time. Any person spent their spare time to take a stroll, shopping, or went to the particular Mall. How about open or read a book entitled Electrical Stimulation of the Heart in the Study and Treatment of Tachycardias? Maybe it is for being best activity for you. You know beside you can spend your time using your favorite's book, you can smarter than before. Do you agree with it has the opinion or you have some other opinion?

#### **Thomas Melendez:**

In this 21st one hundred year, people become competitive in every single way. By being competitive right now, people have do something to make these people survives, being in the middle of the actual crowded place and notice by simply surrounding. One thing that often many people have underestimated the idea for a while is reading. That's why, by reading a publication your ability to survive boost then having chance to stand than other is high. In your case who want to start reading a new book, we give you that Electrical Stimulation of the Heart in the Study and Treatment of Tachycardias book as starter and daily reading reserve. Why, because this book is more than just a book.

#### **John Hickman:**

This Electrical Stimulation of the Heart in the Study and Treatment of Tachycardias is completely new way for you who has fascination to look for some information because it relief your hunger associated with. Getting deeper you into it getting knowledge more you know or you who still having little digest in reading this Electrical Stimulation of the Heart in the Study and Treatment of Tachycardias can be the light food for yourself because the information inside this particular book is easy to get by simply anyone. These books produce itself in the form which can be reachable by anyone, that's why I mean in the e-book web form. People who think that in reserve form make them feel sleepy even dizzy this publication is the answer. So there is no in reading a publication especially this one. You can find what you are looking for. It should be here for a person. So , don't miss the item! Just read this e-book variety for your better life as well as knowledge.

#### **Rod Reese:**

As a pupil exactly feel bored for you to reading. If their teacher expected them to go to the library or even make summary for some reserve, they are complained. Just small students that has reading's heart or real their hobby. They just do what the instructor want, like asked to go to the library. They go to at this time there but nothing reading significantly. Any students feel that reading is not important, boring in addition to can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to

reach Chinese's country. Therefore , this Electrical Stimulation of the Heart in the Study and Treatment of Tachycardias can make you feel more interested to read.
