An Atlas of Anatomy By Regions: Upper Limb, Abdomen, Perineum, Pelvis, Lower Limb, Vertebrae, Vertebral Column, Thorax, Head and Neck, Cranial Nerves and Dermatomes M.C., M.B., Ch.B., Hon. D. Sc. (Man), F.R.C.S. (Edin) J.C. Boileau Grant

About 5 pounds - Pages not numbered - Black, White, and Color Illustrations on almost every page *** This collection of illustrations depicts the structures of the human body, region by region, in much the same order as the student displays them by dissection. Little liberty has been taken with the anatomy; the illustrations profess a considerable accuracy of detail. In order that the student may be able to turn the pages and study figure after figure without requiring to re-orient himself, all illustrations of bilaterally symmetrical structures are from the right half of the body, unless otherwise stated. The observations and comments that accompany the illustrations are designed to attract attention to salient points and to points of significance that might otherwise escape notice. Their purpose is to interpret the illustrations. They are not, nor are they intended to be, exhaustive descriptions.
