## Social Ecology after Bookchin

For close to four decades, Murray Bookchin's eco-anarchist theory of social ecology has inspired philosophers and activists working to link environmental concerns with the desire for a free and egalitarian society. New veins of social ecology are now emerging, both extending and challenging Bookchin's ideas. For this instructive book, Andrew Light has assembled leading theorists to contemplate the next steps in the development of social ecology. Topics covered include reassessing ecological ethics, combining social ecology and feminism, building decentralized communities, evaluating new technology, relating theory to activism, and improving social ecology through interaction with other left traditions.
