Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications

Tawfik Abdo Saleh, Vinod Kumar Gupta

Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications Tawfik Abdo Saleh, Vinod Kumar Gupta

Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications presents a unique collection of up-to-date polymeric nanomaterial membranes. The book offers a perfect source to document state-of-the-art developments and innovations in nanocomposite membranes, ranging from materials development and characterization of properties to membrane applications.

The book discusses applications that encompass the enhancement of sorption and degradation processes and their usage for the removal of different pollutants, including heavy metals, dyes, pesticides, and other organic and inorganic pollutants from the industry.

- Presents a powerful single source for the development of new, rapid, and highly efficient membrane composites
- Offers a perfect source to document state-of-the-art developments and innovations in nanocomposite membranes, ranging from materials development and characterization of properties to membrane applications
- Covers applications in membrane science, water treatment, and the removal of pollutants from waste water
- Provides theoretical and practical information about the synthesis and application of polymeric nanocomposite membranes
- Includes instructor support material available at textbooks.elsevier.com

From reader reviews:

Daniel Soderquist:

Now a day individuals who Living in the era everywhere everything reachable by match the internet and the resources within it can be true or not demand people to be aware of each details they get. How people have to be smart in acquiring any information nowadays? Of course the correct answer is reading a book. Examining a book can help people out of this uncertainty Information specially this Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications book because this book offers you rich data and knowledge. Of course the details in this book hundred per-cent guarantees there is no doubt in it you probably know this.

Raul Warren:

The feeling that you get from Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications is a more deep you excavating the information that hide into the words the more you get considering reading it. It does not mean that this book is hard to comprehend but Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications giving you buzz feeling of reading. The article author conveys their point in particular way that can be understood by simply anyone who read it because the author of this book is well-known enough. That book also makes your own personal vocabulary increase well. That makes it easy to understand then can go along, both in printed or e-book style are available. We highly recommend you for having this specific Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications instantly.

Roy Hanson:

The book untitled Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications contain a lot of information on that. The writer explains your girlfriend idea with easy means. The language is very easy to understand all the people, so do not necessarily worry, you can easy to read this. The book was authored by famous author. The author will take you in the new period of literary works. It is possible to read this book because you can keep reading your smart phone, or program, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site in addition to order it. Have a nice learn.

Charles Smith:

As we know that book is essential thing to add our expertise for everything. By a publication we can know everything we wish. A book is a range of written, printed, illustrated or even blank sheet. Every year was exactly added. This book Nanomaterial and Polymer Membranes: Synthesis, Characterization, and Applications was filled concerning science. Spend your spare time to add your knowledge about your science competence. Some people has distinct feel when they reading the book. If you know how big benefit of a book, you can really feel enjoy to read a guide. In the modern era like at this point, many ways to get

book that you just wanted.
